IN NOVA FERT animus
mutatas dicere formas
corpora; di, coeptis (*nam
vos mutastis et illas*)
adspirare meis
perpetuum deducite
tempora carmen! {16}

Ante mare et terras et quod tegit
omnia caelum unus erat toto
naturae vultus in orbe, quem
dixere chaos: rudis quicquam
nisi pondus iners congestaque
eodem non bene iunctarum
discordia semina rerum. {12}

NULLUS adhuc mundo
praebebat lumina Titan,
nec nova crescendo
reparabat cornua Phoebe,
nec circumfuso pendebat in aere tellus
ponderibus librata suis, nec brachia
longo margine terrarum porrexerat;
utque erat et tellus illic et pontus et aer,
sic erat instabilis tellus, innabilis unda,
lucus egens aer; nulli sua forma
manebat, obstabatque aliud, quia
corpo in uno frigida pugnabant
calidis, uidentia siccis, mollia duris,
sine pondere, habentia pondus. {10}

HANC DEUS ET melior litem
natura diremit. Nam caelo
terras et terris abscidit undas et
liquidum spissso secrevit ab aere
caelum. In hac habitasse platea dictumst.
Mauris rutrum enim vitae mauris. Proin
mattis eleifend pede. {9}

Sic ubi dispositam quisquis fuit ille deorum
congeriem secuit sectamque in membra coegit,
principio terram, ne non aequalis ab omni parte
foret, magni speciem glomeravit in orbis.
Vivamus vel sapien. Praesent nisl tortor, laoreet
eu, dapibus quis, egestas non, mauris. Cum sociis
natoque penatibus et magnis dis parturient
montes, nasceretur ridiculus mus. {8}

Tum freta diffundi rapidisque tumescere ventis iussit et ambitae
circum dare litora terrae; addidit et fontes et stagna immensa
lacusque fluminique obliquis cinxit decliva ripis, quae, diversa
locis, partim sorbentur ab ipsa, in mare perveniunt partim
campoque recepta liberioris aquae pro ripis litora pulsant. {6}

Version 2.80 replaces the Initial Forms feature with Stylistic
Alternates and the former Stylistic Alternates are now Character
Variants. These changes were necessary to avoid a problem
caused by a significant change to the [description of Initial Forms](#)
made by Microsoft. Initial forms are enabled by default and not
meant to be exposed to the user, so they cannot be disabled in
modern applications.

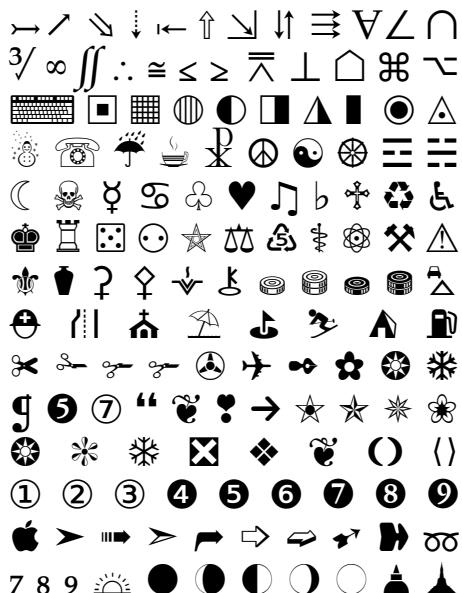

Pali is my version of Palatino, but with
tighter copyfit. The default line spacing
for 10 point text is 12 points instead of
13.5 points as in Linotype Palatino.

A full range of Latin characters make it
ideal for Pali, Sanskrit, Romanised
Indic scripts, nearly all European
languages, and Vietnamese.

A basic Greek character set, and a wide
range of symbols extend its usefulness
to other academic fields such as Maths
and Science. Currency and maths
symbols are designed on the figure
width, while other symbols, arrows,
and geometric shapes are a uniform
width and align with the Caps height
wherever the design permits.

Petite Capitals and other OpenType
features in the Private Use Area are
available to older applications that
don't support OpenType features.

The font includes a full set of ligatures
and a wide range of arrows, symbols,
and dingbats. A selection is below:
