Nullus adhuc mundo praebebat lumina Titan, nec nova crescendo reparabat cornua Phoebe, nec circumsuso pendebat in aere tellus ponderibus librata suis, nec bracchia margine terrarum porrexerat. Amphitrite; utque erat et tellus illic et pontus et aer, sic erat instabilis tellus, innabilis unda, lucis egens aer; nulli sua forma manebat, obstabatque aliis aliud, quia corpore in uno frigida calidis, umentia siccis, mollia duris, sine pondere, habentia pondus. {11}

Mauris purus. Donec est nunc, ornare non, aliquet non, tempus vel, dolor. Integer sapien nibh, egestas ut, cursus sit amet, faucibus a, sapien. Vestibulum purus purus, elementum ac, luctus ullamcorper, ornare vitae, massa. {10}

Hanc deus et melior litem natura diremit. Nam caelo terras et terris abscidit undas et liquidum spisso secrevit ab aere caelum. Quae postquam evolvit caecoque exemit acervo, dissociata locis concordi pace ignea convexi vis et sine pondere caeli emicuit summaque locum sibi fecit in arce; proximus est illi levitate locoque; densior his tellus elementaque grandia traxit et pressa est gravitate sua; circumfluus umor ultima possedit solidumque coercuit orbem. {9}

Sic ubi dispositam quisquis fuit ille deorum congeriem secuit sectamque in membra coegit, principio terram, ne non aequalis ab omni parte foret, magni speciem glomeravit in orbis. {8}

Tum freta diffundi rapidisque tumescere ventis iussit et ambitae circumdare litora terrae; addidit et fontes et stagna inmensa lacusque fluminaque obliquis cinxit declivia ripis, quae, diversa locis, partim sorbentur ab ipsa, mare partim campoque recepta liberioris aquae pro ripis litora pulsant. {6}

Iussit et extendi campos, subsidere valles, fronde tegi silvas, lapidosos surgere montes, utque duae dextra caelum totidemque sinistra parte secant zonae, quinta est ardentior illis,sic onus inclusum numero distinxit eodem cura dei, totidemque plagae tellure premuntur. Quarum quae media est, non est habitabilis aestu; nix tegit alta duas; totidem inter utramque locavit temperiemque dedit mixta cum frigore flamma. {4}

Version 1.90 • 9-2-2017

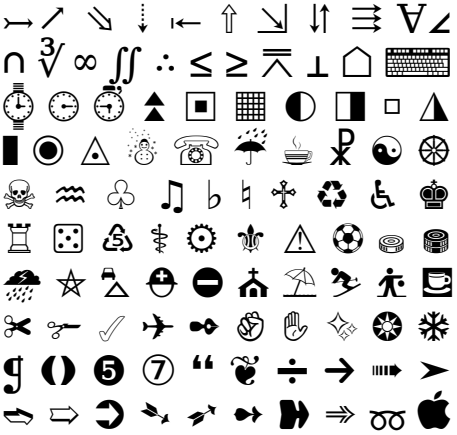
Verajja Serif is derived from Bitstream Vera Serif. The font license allows derivative works.

Smaller versions — in both *.otf and *.woff formats — with fewer symbols, no Petite Capitals or Alternative Fractions, are better for embedding on web sites.

A basic Greek character set, and a wide range of symbols extend its usefulness to other academic fields such as maths and science. The default line-spacing for 10 point text is 13 points.

Superscripts align with the tops of ascenders, and scientific inferiors bisect the baseline. Ordinals for lowercase 1st, 2nd, 3rd, 1ème 2o, 3ú, 16ths and Capitals 1ÈME 2ND 3Ú 4TH etc., work best with lining figures.

The font includes a full set of arrows, symbols, dingbats. Stacking fractions for measurements: 7$\frac{21}{32}$" or 1/8" etc., also work best with the default lining figures. A selection of the many symbols is shown below:



Some dingbats use the Ornaments feature. Type 123 ABC abc etc., to get:
