**I**N NOVA FERT  
 animus mutatas  
 dicere formas di,  
 coeptis adspirate  
 meis primaque ab  
 origine mundi mea  
 deducite tempora  
 carmen! {16}

Ante mare et terras et quod  
 tegit omnia caelum unus  
 erat toto naturae vultus in  
 orbe, quem dixere chaos:  
 rudis indigestaque moles  
 nec quicquam nisi pondus  
 iners congestaque eodem  
 non bene iunctarum  
 discordia rerum. {12}

**N**ULLUS adhuc mundo  
 praebebat lumina Titan,  
 nec nova crescendo  
 reparabat cornua

Phoebe, nec circumfuso  
 pendebat in aere tellus  
 ponderibus librata suis, nec  
 brachia longo margine  
 terrarum porrexerat {10}

Hanc deus et melior litem natura  
 diremit. Nam caelo terras et terris  
 absceidit undas et liquidum spisso  
 secrevit ab aere caelum. Quae  
 postquam evolvit caecoque exemit  
 pace ignea convexi vis et sine  
 pondere caeli emicuit summaque  
 locum sibi fecit in arce. {9}

**S**ic ubi dispositam quisquis fuit ille  
 deorum congeriem sectamque in  
 membra coegit, principio terram,  
 ne non aequalis ab omni parte foret,  
 magni speciem glomeravit in orbis. {8}

Tum freta diffundi rapidisque tumescere ventis iussit et  
 ambitae circumdare litora terrae; addidit et fontes et  
 stagna inmensa lacusque fluminaque obliquis cinxit  
 declivia ripis, quae, diversa locis, partim sorbentur ab  
 ipsa, in mare perveniunt partim campoque recepta  
 liberioris aquae pro ripis litora pulsant. {6}

Iussit et extendi campos, subsidere valles, fronde tegi silvas, lapidosos surgere  
 montes, utque duae dextra caelum totidemque sinistra parte secant zonae, quinta  
 est ardentior illis, sic onus inclusum numero distinxit eodem cura dei, totidemque  
 plagae tellure premuntur. Quarum quae media est, non est habitabilis aestu; nix  
 tegit alta duas; totidem inter utramque locavit temperiemque dedit mixta cum  
 frigore flamma. {4}

Ver 3.70 4/2/2017

The archive includes Web  
 versions with fewer glyphs.

Verajja has a full range of Latin  
 characters so it can be used for  
 Pali, Sanskrit, most European  
 languages, and Vietnamese.

A full Greek character set, and a  
 wide range of symbols extend its  
 usefulness to other fields such as  
 maths and science. Maths and  
 currency symbols are designed  
 on the figure width, while other  
 symbols, arrows, and geometric  
 shapes are a uniform width and  
 align with the Caps height  
 wherever the design permits.

Superscripts align with Caps,  
 scientific inferiors<sub>2</sub> bisect the  
 baseline, and subscripts sit on the  
 baseline. The default line spacing  
 for 10 point text is 13 points.

The font includes a wide range  
 of arrows, symbols and dingbats.
