FontCreator 11.5

Released 22nd February 2018

- Support for Unicode variation sequences
- Comes with ttfautohint version 1.8.1
- Open contours while designing fonts
- Export as <u>single line font</u>:
  Open contours are not allowed in fonts, so FontCreator will do some magic to make fonts look like single line fonts which can be used for engraving.
- Support for <u>last resort fonts</u>

Version 11.5 build 2426

- Support for <u>WOFF 2.0</u> (improved compression)
- New Export Options: WOFF 1.0, WOFF 2.0, or both
- New options for Export All (all TTF/OTF, or all WOFF)
- Several bug fixes

Version 11.5 build 2430

- Fixed <u>SVG import issue</u>
- Fixed <u>WOFF 1 export issue</u>
- Fixed class0 in preview
- Added a generate button to smoothing
- Improvements to the user manual
- Several user interface improvements
- <u>Full Release History</u>
