IN NOVA FERT animus mutatas dicere formas corpora; di, coeptis (nam vos mutastis et illas) adspirate meis primaque ab origine mundi ad mea perpetuum deducite tempora carmen! {16}

Ante mare et terras et quod tegit omnia caelum unus erat toto naturae vultus in orbe, quem dixere chaos: rudis indigestaque moles nec quicquam nisi pondus iners congestaque eodem bene discordia semina rerum. {12}

NULLUS adhuc mundo praebebat lumina Titan, nec nova crescendo reparabat cornua Phoebe, nec circumfuso pendebat in aere tellus ponderibus librata suis, nec bracchia longo margine terrarum porrexerat. Nulla vestibulum eleifend nulla. Suspendisse potenti. Aliquam turpis nisi, venenatis non, accumsan nec, imperdiet laoreet, lacus. In purus est, mattis eget, imperdiet nec, congue, tortor. {10}

Hanc deus et melior litem natura diremit. Nam caelo terras et terris abscidit undas et liquidum spisso secrevit ab aere caelum. Quae postquam evolvit caecoque exemit acervo, dissociata locis concordi pace ignea convexi vis et sine pondere caeli emicuit summaque locum sibi fecit in arce; proximus est aer illi levitate {9}

Sic ubi dispositam quisquis fuit ille deorum congeriem secuit in membra coegit, principio terram, ne non aequalis ab omni parte foret, magni speciem in orbis. {8}

Tum freta diffundi rapidisque tumescere ventis iussit et ambitae circumdare litora terrae; addidit et fontes et stagna inmensa lacusque fluminaque obliquis cinxit declivia ripis, quae, diversa locis, partim sorbentur ab ipsa, in mare perveniunt partim liberioris pro ripis litora pulsant. {6}

Iussit et extendi campos, subsidere valles, fronde tegi silvas, lapidosos surgere montes, utque duae dextra caelum totidemque sinistra parte secant zonae, quinta est ardentior illis,sic onus inclusum numero distinxit eodem cura dei, totidemque plagae tellure premuntur. Quarum quae media est, non est habitabilis aestu; nix tegit alta duas; totidem inter utramque locavit temperiemque dedit mixta cum frigore flamma. {4}

Updated for version 1.71
on 9/2/2016

OpenSans includes complete Latin Basic, Latin-1 Supplement, Latin Extended-A, and Cyrillic character sets, plus Greek and Coptic, Cyrillic supplementary, and Latin Extended Additional characters to support many languages – even Vietnamese.

The Apache license allows others to enhance or modify the font, provided that they document the changes in the font and distribute their own version under the same license conditions.

Stylistic Alternates give quick access to localized forms from the text context toolbar.
